PROFILE SUMMARY

Frontend Software Developer with 2+ years of experience delivering production-grade web and mobile applications using **React, TypeScript, and React Native**. Experienced in building scalable, high-performance applications, developing reusable UI components, integrating RESTful APIs, and optimizing frontend performance. Proven ability to own features end-to-end, collaborate with cross-functional teams, mentor junior developers, and clearly communicate technical solutions to both technical and non-technical stakeholders.

TECHNICAL SKILLS

Core Technologies: React, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend Libraries & State: Material UI, React Hook Form, React Table, Zod, Zustand, Redux, React Query (TanStack Query), React Router DOM, Next.js

Backend & APIs: Node.js, Express.js, NestJS, REST APIs

Languages: Java, JavaScript, TypeScript, Python, C, C++

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Swagger, Postman, VS Code, IntelliJ, Cursor

WORK EXPERIENCE

Software Developer – Frontend

Sept 2024 – Present

Illumify (Remote)

- Owned and delivered **6+ core ERP frontend modules** for a production-scale cannabis ERP platform using React and TypeScript.
- Architected reusable UI components with Material UI, reducing new feature development time by **30%**.
- Implemented schema-based form validation using React Hook Form and Zod, decreasing client-side data errors by **40%**.
- Integrated RESTful APIs using TanStack Query, improving data fetching efficiency and enabling **25% faster page load times**.
- Led frontend performance optimization initiatives, improving Lighthouse performance scores from **68 to 90+**.
- Collaborated with backend engineers, product managers, and designers to translate business requirements into scalable UI solutions, actively participating in sprint planning and feature demos.
- Mentored junior developers by reviewing pull requests, enforcing coding standards, and documenting frontend best practices.

PROJECTS

Hospital Management System

Feb 2024 – Mar 2024

Java, MySQL

- Designed and implemented a role-based hospital management system using Java and MySQL, supporting **200+ concurrent users**.
- Developed modules for patient records, appointments, billing, and reporting, reducing manual record handling by **60%** in simulated workflows.
- Applied object-oriented design principles to ensure scalability, maintainability, and clean architecture.

EDUCATION

NIST University, Berhampur, Odisha

2020 – 2024

B.Tech in Computer Science and Engineering

CGPA: 9.3/10

Khallikote H S School, Odisha

2020

12th Board (CHSE)

Percentage: 77%

Saraswati Sishu Vidya Mandir, Odisha

2018

10th Board (BSE)

Percentage: 86%

ACHIEVEMENTS

- Ranked in the **Top 5% nationwide** in Java Programming (NPTEL, Sept 2023).
- Earned **Ranger Rank** on Salesforce Trailhead with **93,000+ points**.
- Selected among **500 students nationwide** for the PwC Launchpad Program 2023.
